Today's businesses are driven
by one constant: Change.

You either create your future,
or you fall behind.

We exist to provide resilience.

We understand your business.

We do not compromise.

We build trust through execution.

We transform and innovate.

We are passionate.

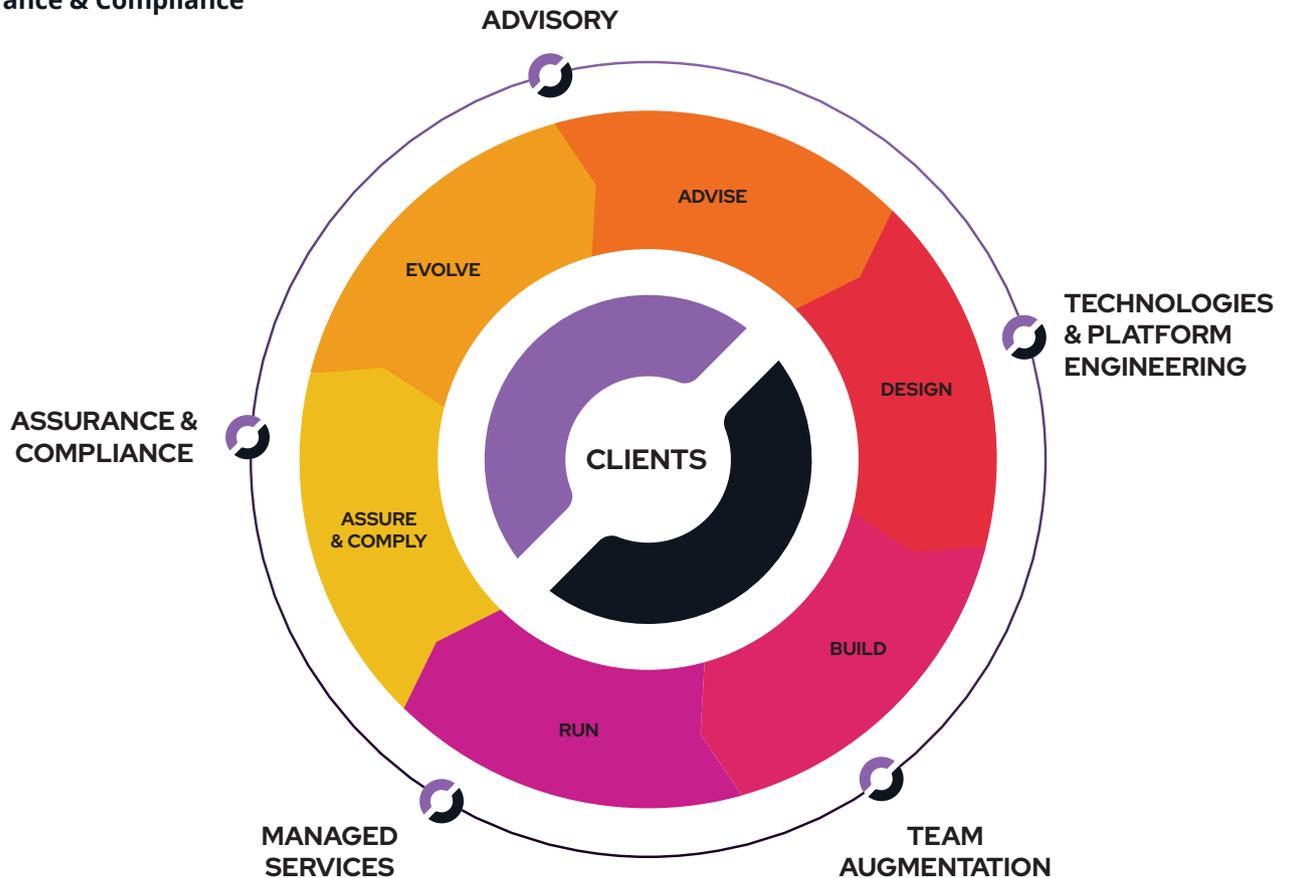

We are real.

We are security.

Sekuro. Trust Tomorrow.

We deliver end-to-end cybersecurity solutions across the business lifecycle:

- 🔄 Advisory
- 🔄 Technologies & Platform Engineering
- 🔄 Team Augmentation
- 🔄 Managed Services
- 🔄 Assurance & Compliance

Our origin

Never in history has innovation moved so rapidly and at such scale. As fast as technology reveals opportunities for smart leaders, it exposes deep vulnerabilities for bad actors.

Cybercrime has never had it so good. Cybersecurity has never been so important.

Faced with a threat that never sleeps, Sekuro was created in 2021. By combining the value-aligned forces of four of Australia's leading cybersecurity companies, we've unlocked market-leading technologies, powerful practices, end-to-end solutions and the sharpest minds in the industry.

Working together, we're uniquely positioned to secure modern enterprises and challenge the biggest players in the market. A proudly Australian company with bold global ambitions, Sekuro is building a tomorrow you can trust.

“

There are cases in which the greatest daring is the greatest wisdom.

Carl von Clausewitz

**Our vision is to enable
fearless innovation through
world-class resilience.**

Our mission

To be the most trusted security partner. Through the delivery of impactful outcomes that build resiliency, we enable innovation and increase competitiveness.

From the excellence of our delivery to the integrity of our people, we put care into everything we do and see every client as a #clientforlife.

Our difference

Sekuro is founder-led and founder-fuelled. The same team that founded our Australian legacy brands created Sekuro. This ensures our deep knowledge, care and ability to execute at pace remains, and that our clients continue to benefit from the level of service and hyper care they have come to expect.

Our strategy

The global cybersecurity market continues to outperform expectations due to rapidly increasing threats and changing regulatory landscapes. At all levels – as nations, businesses, communities and individuals – cyber is the new battlefield and, in that context, resilience is paramount to be able to go forth and innovate.

Security requires a keenly aligned defensive capability covering people, systems and information. Organisations often hire experts to address perceived gaps in their defences, but rarely gain a complete picture of their security posture, which means attackers still have the upper hand.

Founded by four of Australia's leading cybersecurity organisations, with a commitment to continuously researching and developing leading-edge capabilities, Sekuro is ideally positioned to help organisations Trust Tomorrow. We provide fully integrated end-to-end security services with high standards of accountability and care, offering an unprecedented client experience and aiming to turn every client into a #clientforlife.

Our Trust Tomorrow strategy has four phases:

01 Integrate today.

Leverage the best capabilities from each business to create a scalable platform and also respond to the evolving skills challenges of the security industry, while preserving the values, culture and care of Sekuro's founding companies. Seamless integration across our people, processes and technologies enables us to deliver unprecedented client experience.

02 Imagine tomorrow, continuously.

Maintain our position as trusted innovators by consistently creating new capabilities – organically or through value aligned-partnerships – and always being prepared to tackle tomorrow's challenges.

03 Share our capability.

Expand within the industry and market segments facing strong security challenges to which we bring a differentiated response. Clients can leverage both our innovative and targeted capabilities as well as our long-established and competitive service offerings.

04 Challenge ourselves to be better.

Always remain our clients' partner of choice, committing to the values and the social responsibilities we hold dear, while embracing tomorrow's challenges. We improve and even re-write our playbooks whenever necessary to innovate as an enterprise to continue to attract visionary talents and clients.

Our values

Be fearless

Cybersecurity never sleeps. Success takes a passion for constant learning, an appetite for change and a willingness to disrupt (and be disrupted).

Strive for better

At work, home and in the community, we will try to enact positive change. We speak up and support others to drive that change. We don't settle for second best.

Tell it like it is

We owe it to our clients to be honest, transparent and straight-talking.

Be curious and generous

We grow richer by sharing our knowledge. We look for ways to connect with colleagues, clients and the industry to broaden our skills and networks.

Own the outcome

We love our craft, and take pride in making a difference. We face our clients' challenges as a genuine partner, and tackle them as if they were our own.

Care for your team

We can only do our best work in an environment of support and respect. We always strive to gain a better understanding of the perspectives and challenges of our team mates.

Culture & Community

Sekuro takes great care and pride in curating a culture which promotes our diversity, individual passions and development aspirations. Our collective values bring us together as one team to execute our mission.

Sekuro is committed to nurturing fair social procurement, diversity and inclusiveness.

Our team is made up of people from diverse cultural backgrounds from countries across the world including Australia, France, China, India, Italy, Russia, Singapore, South Africa, Malaysia, Philippines, the UK, Zimbabwe and many more.

Our team's commitment to advancing the security industry has led to a range of professional development initiatives, including our popular 'Talent Accelerator (Hackcelerator) Mentorship' program. Through these initiatives, staff at any level can access reputable training along with the opportunity to engage with real-world examples and learn practical skills and knowledge from experienced and qualified industry mentors.

Sekuro is committed to ensuring all our activities and endeavours have the least amount of impact on the environment.

Our sustainability initiatives include paperless offices, flexi-work policies, efficient recycling and waste management, ongoing reduction of energy and carbon emissions and a commitment to sustainable procurement.

To support the communities in which we operate, once a quarter all Sekuro staff members are encouraged to spend a day contributing to a local charitable association of their choosing.

Services & Solutions

Advisory

- 🔗 **Governance, Risk & Compliance (GRC)**
Design, plan and implement tailored information security strategies, management systems, governance & risk management frameworks and document security.
- 🔗 **Proactive Security**
Work with your team to secure your cloud's design and configuration, plan for incident response and perform secure code reviews.
- 🔗 **Awareness & Training**
A tailored range of cybersecurity awareness, training and education solutions suitable for both highly technical and/or business user audiences.

Assurance & Compliance

- 🔗 **Offensive Security**
Advanced intelligence-led attack simulations (RED teams), war-room incident response drills, physical rogue intrusion testing, intelligence gathering and penetration testing.
- 🔗 **Governance, Risk & Compliance (GRC)**
We cover all aspects of risk management and we perform a range of assessment and audits covering key standards and regulations such as ISO 27001, ISM, PCI DSS, CPS 234, SOC2, Privacy Act, RFFR, TDIF and more.
- 🔗 **Proactive Security**
We leverage the deep technical expertise of our engineering team, GRC and offensive security teams to ensure all your technologies and platforms are correctly implemented, configured and governed to improve your visibility and readiness to an adverse event.

Technologies & Platform Engineering

🌀 Multi-cloud Engineering

We design, build, secure and optimise cloud platforms (private, public or hybrid), leveraging next gen and best in class technologies such as VMWare, AWS, Azure, Pure Storage, Cisco, Rubrik, Cohesity, Veeam, NewRelic and Datadog.

🌀 Security Engineering

We have deep technical expertise in end-point detection & response, vulnerability & patch management, email security, firewalls, web & perimeter, log aggregation, key management & encryption, network access control, SASE & CASB. We create tailored solutions leveraging technologies like CrowdStrike, CyberArk, Qualys, Tenable, Automox, Mimecast, Imperva, Splunk, Thales, Forescout and Netskope.

🌀 Modern Workplace

We enable the modern way of working, leveraging the full power of your O365 license and the many feature it carries, supercharged with the power of leading IDAM technologies like Okta, Auth0 and SailPoint.

Team Augmentation

🌀 Team Augmentation

From standing up entire program and project teams to augmenting your team with that unique skillset it needs to achieve its objectives, we take the resourcing burden away and allow our clients to execute with pace.

Managed Services

Threat Response & Intelligence Operations (TRIO Centre)

We provide a full threat management capability, including monitoring, hunting, managed detection and response, advanced analytics and behavioural modelling, analysis, and insider threat mitigation.

Incident Response

We investigate, contain, and respond to attacks as quickly as possible while maintaining a focus on getting the business operational and preserving digital evidence.

Continuous Compliance

We manage ongoing compliance and auditing requirements (PCI DSS, ISO27001, ISM, SOC, CPS234 and others) to make sure our clients continuously maintain compliance and get the most operational benefits out of their compliance investments.

Continuous Optimisation

We implement continuous attack simulation and detection to continuously test and refine your monitoring capabilities, whether internal or external, and keep you in lockstep with – or ahead of – threat actors.

A cybersecurity partner you can trust, ensuring your success tomorrow.

Sekuro strengths

Proven Track Record

For over a decade, Sekuro's founding management have protected businesses from accelerating cybersecurity threats. We are trusted by clients spanning the government, finance, retail, IT, health, entertainment and not-for-profit sectors.

Business First

We understand that technology is a means to an end. By bridging the gap between your technical experts and executive teams, we are driven by delivering tangible benefits, informing your decision-making and helping you achieve your objectives.

Outcomes-Obsessed

Taking the time to listen and understand the full picture enables us to design and implement the ideal solution. Your single-point of contact will take full accountability for delivering that solution, and the desired outcome.

Expertise & Experience

Senior positions at Sekuro are held by recognised industry experts. We are proud of the many enduring client relationships we have built, based on trust, integrity and care.

Flexible & Innovative

In business, change is the one constant. We understand that priorities, threats and regulations shift. As an agile team with deep industry knowledge, we can help you adapt to the changing landscape, fast.

Strict Quality Standards

We uphold strict standards of honesty, rigor and service. Our processes are backed by a solid track record, supported by industry certifications that are recognised globally.

Why choose Sekuro?

Today's organisations are driven by one constant: Change.

You either create your future or you fall behind. At Sekuro, we secure your operation so you can innovate at speed and achieve your goals, safely.

Our reputation is built on proven execution, which is why we are trusted by some of the biggest brands and government agencies across Asia Pacific.
